

# Metazyme

Pepsin, Pancreatin, Lipase, Cellulase & Xylanase

## A Perfect Combination of Digestive Enzymes for Poultry

### COMPOSITION

---

Each 1 g contains: Pepsin 50 mg, Pancreatin 100 mg, Lipase 10 mg, Cellulose 20 mg & Xylanase 50 mg.

### MODE OF ACTION

---

Pepsin: Digest protein found in ingested feed.

Pancreatin: Helps to digest protein and starch type feed.

Lipase: Break down fats in feed so they can be absorbed in the intestines.

Cellulose: Helps to digest feed containing fibers.

Xylanase: Improved degradation and absorption of Non-Starch Polysaccharides.

### INDICATION

---

- To enhance digestion
- To increase utilization of amino acid, vitamin and mineral
- To improve FCR
- To increase body weight and production
- To reduce feed cost
- To reduce any kind of stress

### DOSAGES & ADMINISTRATION

---

Via water: 1 gm per 2-3 litres of drinking water for 5-7 days.

Or as directed by Poultry Specialist or veterinarian.

Via feed: 0.35-0.5 gram per 1kg balanced feed for 5-7 days.

### STORAGE

---

Store below 30 ° C, Keep away from light. Keep out of reach of Children.

### PACK SIZE

---

100 g, 500 g
