

Nu3leaseX

1,4-beta xylanase-1600BXU/g

Formulations

Healthcare

Increases nutrient utilization effectively

COMPOSITION

1,4-beta xylanase 1600 BXU/g

MODE OF ACTION

Nu3lease X is a unique xylanase enzyme feed additive scientifically developed for consistent and premium performance. A 1,4-beta-xylanase, Nu3leaseX improves animal nutrition and gut health by breaking down non-starch polysaccharides (specifically xylans) in cell walls of feed grains so that valuable entrapped nutrients can be released for digestion.

INDICATION

- By breaking down xylans, xylanase helps release trapped nutrients, making them more accessible for absorption in the gastrointestinal tract
- Liberates ready source of energy which is absorbed easily by the intestine of the birds
- Helps in increasing the weight gain of poultry
- Improvement in wet litter conditions, reducing the chance of loose dropping and disease conditions etc.
- Improves FCR
- Prebiotic effect: Boost the growth of beneficial bacteria thereby improve the animal's health status
- Improve immunity and productivity

DOSAGE & ADMINISTRATION

100 gm per metric ton of feed.

STORAGE

Store below 30 ° C, Keep away from light. Keep out of reach of Children.

PACK SIZE

25 kg
