SUPER – HIT Libido Enhancer

Super-Hit is a natural animal health product based on selected potent herbs. The use of herbal Super-Hit ensures high performance levels and optimum fertility in breeding males. With other commercial formulations, separate products are required to prompt spermatogenesis and libido respectively, while Super Hit alone takes care both of the requirement more efficiently. Research studies have shown following unique actions of Super-Hit:

- Significant increase of Spermatogenesis along with improvement in fertility index of spermatozoa and their forward progressive motility
- Enhances motility and metabolic activity of the spermatozoa along with increase in semen volume and live spermatozoa
- Optimizes and maintains blood androgen level without any metabolic or other side effects.
- Promotes full growth and development of sex organs such as epididymis, seminal vesicles and testes and augments testicular protein and testosterone synthesis
- Improves testicular activity with higher acid phosphatase and alkaline phosphatase activity
- Increase fructose and citric acid content of the accessory sex glands, which play a vital role as nutrients for spermatozoa and to optimize libido and fertility

Indications

- For improving libido, sexual behavior and functioning along with complete ejaculations
- For full development and functional maturations of sexual organs
- To increase semen volume with proper viscosity and viability along with enhanced motility and metabolic activity of the spermatozoa
- To enhance spermatogenesis and fertility index of spermatozoa

Composition (per 100 g)

- | | |
|-----------------------------|-------|
| • Withania somnifera | 40 g |
| • Asphaltum | 5 g |
