

Ammoklean

Yucca schidigera extract

Modern Technology for Ammonia Reduction

COMPOSITIONS

Sarsasapogenin 30%, Polysaccharide 09%, Polyphenol 12%, Bacillus Subtilis 07%, Yeast 08%

INDICATION

1. Absorbs toxic gases like Ammonia, Hydrogen Sulfide, Methane etc, Suppress the breeding of protozoa and other noxious bacteria.
2. Improves water quality quickly and optimizes plankton levels in high-risk conditions.
3. Improve the absorption & utilization rate of nutrients facts
4. Improve immune and decrease incidence of a disease
5. Increase dissolved oxygen levels, reduces chemical oxygen demand (COD) and biological oxygen demand (BOD)

DOSAGE & ADMINISTRATION

Prevention:

85 mL/Acre (100 decimal)

For a water depth of 4 feet it should be applied 2-3 weeks interval.

Control:

150 mL/Acre (100 decimal)

For a water depth of 4 feet only should be applied 1-2 times in every 5-7 days interval.

The solution should be mixed with 100 mL/20 liters of water before use.

Application labels may vary according to ammonia concentration.

Poultry/Cattle:

1 mL/ 45 Liter of drinking water.

Or, as per recommended by aqua/veterinary consultant.

PACK SIZE:

100 mL & 500 mL
